

### ADVANTAGE DYNAVIS MEHF HYDRAULIC FLUID

**ADVANTAGE DYNAVIS MAXIMUM EFFICIENCY HYDRAULIC FLUID** is a highly refined, premium quality semi-synthetic, multi-viscosity fluid designed for maximum efficiency. This fluid is also excellent for severe service applications where high operating temperatures, air entrainment, contamination with water or wear metals and high system pressure could contribute to shortened oil life. This oil is characterized by outstanding thermal and oxidative stability, excellent cold temperature properties and very high viscosity index. Performance exceeds most OEM requirements.

Although this product is more expensive than standard hydraulic fluids, the benefits allow fast pay back on higher oil costs.

ADVANTAGE DYNAVIS MEHF has been proven to:

- lower fuel and energy consumption for the same amount of work
- Boost power output
- Increase pump flow rates to improve productivity
- Widen temperature operating range
- Reduce overheating and risk of equipment shutdown
- Reduce overall cost for equipment operators

#### TYPICAL PROPERTIES

PROPERTY	DYNAVIS MEHF 32-100
Gravity, API (D287)	31.5
Viscosity, cSt @40 °C (D445)	48
Viscosity, cSt @100 °C (D445)	10.45
Viscosity Index (D2270)	210
Oxidation Stability, TOST (D943)	7000
Demulsibility (D1401), min	20
Rust (D665 A&B)	Pass
Flash Point, COC °F (D92)	425
Pour Point °C (D97)	-35
