

ADVANTAGE AVIATION SMOKE OIL

OVERVIEW

ADVANTAGE AVIATION SMOKE OIL is a severely hydro-treated, low viscosity paraffinic oil specifically made for the airshow industry. Its low viscosity and highly refined nature ensures little impurities for quick vaporization and a clean, thick burn. Our toxin free formulation is bright, clear and lasting and suitable for all types of aircraft display presentations.

FEATURES & BENEFITS

ADVANTAGE AVIATION SMOKE OIL is a paraffin-based product with a lower viscosity and excellent resistance to low temperatures. Completely free of any harmful chemical additives that could cause concern, **ADVANTAGE AVIATION SMOKE OIL** won't harm engines or smoke-emitting systems.

APPLICATIONS

ADVANTAGE AVIATION SMOKE OIL can be used by piston-powered or turbine-power aircraft or in dedicated smoking systems utilized by skywriting and display aircraft.

TYPICAL PROPERTIES

Product Code	1145
Appearance	L0.5
Viscosity, cSt @ 100°C	2.77
Viscosity, cSt @ 40°C	11.1
Viscosity Index	87
Flash Point, °C	190
Pour Point, °C	-18
